Subject: Revised List of LWG
Attachments: Draft List of LWG Major Section 1 FS Issues 072314 (2).pdf

Kristine,

In preparation for our conference call this morning (11:00am Pacific Time) we are providing an updated list of LWG major issues with the draft revised FS Section 1. The only change to the previous LWG list, which Carl sent you as a "preliminary draft list" via email on July 17, is related to item #3.c -Deletion of Stormwater Sources. The revised text more accurately captures the LWG's concern.

Please forward this revised list to the pertinent members of your technical team for reference during today's conference call, and feel free to call me if you have any questions.

Thanks,

Jim McKenna
